

## SKILLS

- Full-stack development
- Cross-functional teamwork
- REST
- APIs
- API design
- Database management
- PostgreSQL
- Database Design
- Database Design
- Docker
- Integrated development environment
- Git
- Deployment & Maintenance
- Server Administration
- Cloud Computing
- Software testing
- Problem resolution
- Technical documentation
- Project management
- Integrated development environment
- VS Code
- Cross-functional teamwork
- Object-Oriented Programming (OOP)
- Basic programming
- Basic programming
- Server Administration
- Deployment & Maintenance
- C++
- C#
- Java
- JavaScript

## SUMMARY

Skilled Full-Stack Developer with experience in building systems using React, Next.js, Node.js, C#, and PostgreSQL. Expertise in enhancing web application delivery, designing REST APIs, and optimising SQL queries. Proficient in CAD modelling and integrating mechanical and electronic subsystems for rover projects. Experienced in deploying applications on Linux with Docker and cloud infrastructure, with a solid foundation in software engineering practices and project management.

## WEBSITES, PORTFOLIOS, PROFILES

## EXPERIENCE

September 2024 - Current

### Rover Team Member Rover Team Ozyegin University

- Delivered better rover outcomes by contributing to rover design and development.  
Improved mechanical readiness by completing CAD modelling and component design work.  
Strengthened system reliability by integrating mechanical and electronic subsystems collaboratively.  
Raised rover performance confidence through testing, troubleshooting, and evaluation.  
Advanced competition readiness by supporting prototyping and assembly for projects.

February 2020 - Current

### **Full-Stack Developer Freelance / Personal Projects**

- Improved web application delivery by developing full-stack systems with React, Next.js, Node.js, C#, PostgreSQL.  
Enabled smooth payment and account experiences by designing REST APIs for automation and user management.  
Enhanced usability across devices by building responsive user interfaces with strong performance focus.  
Increased application efficiency by designing database schemas and optimising SQL queries.  
Supported stable releases by deploying and maintaining applications on Linux with Docker and cloud infrastructure.  
Delivered tailored business outcomes by building education platforms, payment integrations, and management systems.  
Streamlined workflows by integrating third-party payment, authentication, and messaging APIs into applications.  
Delivered dependable products by managing projects from planning through deployment and ongoing maintenance.

September 2020 - October 2022

### **Software Engineering Intern AN Goldwatch | Baku, Azerbaijan**

- Develop and maintain web applications using JavaScript, C#, and SQL.  
Own design and implementation of REST API endpoints for internal systems.  
Drive debugging and fixes to maintain application stability.  
Take responsibility for writing and optimising SQL queries for relational databases.  
Coordinate with developers through development, testing, and deployment phases.  
Lead code reviews and apply software engineering best practices.

## **EDUCATION**

2027

### **Bachelor of Science | Computer Science**

Ozyegin, Istanbul, 34

- Pursuing a Bachelor of Science in Computer Science  
Relevant coursework: Data Structures and Algorithms, Database Systems, Object-Oriented Programming, Computer Networks, Operating Systems, and Software Engineering  
Developed software projects involving full-stack web development, REST APIs, and database design  
Experience with C++, C#, JavaScript, SQL, PostgreSQL and cloud-based deployment  
Active member of the Özyeğin University Rover Team, contributing to engineering and technology projects.

2022

### **Diploma of Higher Education**

Ankara Lisey, Baku

- Graduated from Ankara High School in 2022, completed secondary education with a focus on Information Technology, studied mathematics, computer science, physics, and information technologies, and participated in technology-related coursework and academic projects

2020

**Higher National Diploma** | Software Development / Information Technology

STEP IT Academy, Baku

- Completed professional training in Software Development and Information Technology, studied programming fundamentals, object-oriented programming, and software design principles, developed practical projects using C++, C#, SQL, and web technologies, gained experience in database design, algorithms, and application development, participated in team-based software development projects and technical workshops

---

## HOBBIES AND INTERESTS

- Software development and open-source technologies
- Robotics and engineering design
- Entrepreneurship and startup projects
- Boxing and competitive sports
- Cloud technologies and system architecture
